Remember the days we used to share
Remember the time when I was there
I believed every single word you said
Just like a child I lost my head

I didn't care if it was day or night
I just wanted to have you by my side
The moon went up, the sun went down
But you were still around

Refrain:
Alta gracia, my love (4x)

Remember how we spent the night
How we kissed and held each other tight
Everything was like a beautiful dream
You were the sweetest woman I've ever seen

How could I know our love wouldn't stand a chance?
I had to go and end this wonderful romance
Now I'm so sad and blue, here without you, what can I
do?

I used to love her from the bottom of my heart
Didn't realize that time was slippin' by
Now we're living oh so far apart
I give grace for the days that I held her by my side
By my side
