I know it's not always a party
Living with a guy like me who's always in outer space
Maybe I don't know what's good for me
I never thought a girl like you could ever change my
ways

Lately I've been feeling uneasy
Thought it might have been something I said I didn't
mean
If you get to know me much better
You will see it's never my intention to be mean

You make me weightless
When I get home I float around my whole living room
You make it painless
Like I am on acetaminophen all the time

Tracy my sister thinks I'm crazy
Going for a girl who's gonna leave me in the end
I don't know but I'm gonna chance it
You never know with this kind of thing
Anything could change

You make me weightless
When I get home I float around my whole living room
You make it painless
Like I am on acetaminophen all the time
All the time

You make me weightless
When I get home I float around my whole living room
You make it painless
Like I am on acetaminophen all the time
Yeah...
