I got into my Chevy and head on down to Mexico
I left my baby cry cause she don't want me to go
But this town is getting crowded
And there ain't no room to move around
Got my guitar in the back clear road ahead
Motors running good really feeling good

I've got myself a new thing going
Where it'll end just ain't no way of knowing
Just cruising on and knowing my way

I've got myself a new thing started
I left my baby broken hearted
It's down to me the games I play

When I stopped in Sacramento for this hitch hiker chick
out on the road
She said are you going to phoenix said I'll take you
anyway you wanna go
As we're driving down the road
See a sign saying driving motel
Pull the Chevy in the lot leave it for the night
Motors running good really feeling good

I've got myself a new thing going
Where it'll end just ain't no way of knowing
Just cruising on and knowing my way

I've got myself a new thing started
I left my baby broken hearted
It's down to me the games I play
