Looking back to days gone by I was young my hopes
were high
You were sixteen like a young queen with an angels
eyes
I was lucky as could be when you said please dance
with me
From the first day you were my flame with an angels
eyes

Chorus

We're kissing in the moonlight
Love was shining so bright and true
When dancing in the starlight
Sweet memories of my first night with you

Summer ends you and I came apart we said goodbye
I was lonely you're the only with an angels eyes
Everyday away from you broke my heart and left me
blue

From the first day you were my flame with an angels
eyes

Chorus

We're kissing in the moonlight
Love was shining so bright and true
When dancing in the starlight
Sweet memories of my first night with you

I wonder who you kissing now
I wonder do you dream somehow about me

From the first day you were my flame with an angels
eyes

Chorus
