Every breath of air  
Was a silent prayer  
I was longing for Your face

And I wondered why  
All the years went by  
Without a single trace

Anticipating, Lord, we've been waiting  
Just watching the days come and go  
But now we know

Joy and the angels sang  
There was joy  
Let the whole world know this  
Joy, our King has finally come  
Joy, here is the promised One

Set the captives free  
Tell the broken reed  
Hope has been restored  
And the one who cries  
For a wandering child  
Her tears are not ignored

Father in heaven,  
You gave us reason to see past the pain of today  
We celebrate

Chorus

Unending hope for all time  
When the King of the ages arrived

Chorus
