You still remind me of the rain,  
The way you bring so many clouds and block the day  
You've always known where to place the blame  
Just say were all the same and nothing seems to  
change

(Bridge)  
I'll watch you fade; I'll watch you fade away

(Chorus)  
Out of sight, out of mind, where I draw the line  
Fall to pieces, every time, I see you  
Turn away, as you say, you'll survive (that's a lie)  
So I'll watch you faded away, from the corner of my  
eyes

Nothing change since now and then  
A bitter fight, to the bitter end, but the best of friends  
I'm never left with much to say  
So go away, go away, bad company

Repeat Bridge  
Repeat Chorus

It's like the end of the world again  
I'm losing all the best of friends

Repeat Bridge  
Repeat Chorus  
So I'll watch you faded away, from the corner of my  
eyes  
It's like the end of the world again
