"Goodbye"

Relearning everything so she can move around
She burning everything that held her to the ground
On the talk of letting go
She wants the whole wide world to know
She not alone here anymore

(Chorus)

It's time goodbye, gotta see this eye to eye,
It's time goodbye, don't want to live a lie,
It's time goodbye

Home has never been so close and still so far
When every path ahead leads back to where you are
In the end it's a matter of who you are
Who around when the seasons are at it's highs and
lows
Tell the people in your life who would rather see you go

(Chorus)

Gotta see this eye to eye,
It's time goodbye, don't want to live a lie,
It's time goodbye

(Bridge)

Fly, fly, there's nothing holding you down
Fly, fly, there's nothing holding you down
Fly, fly, there's no one holding you down
(There's no one holding you down)

(Repeat Chorus)

(Vamp)

It's time goodbye, no matter what you say
It's time goodbye, no matter what you do
