Wait now, baby, put the gun down  
I was just kidding, I was jokin' around  
Talk is cheap and so am I  
It's inconceivable to try  
to believe there's a sane one between us now

I am rubber, you are glue  
We're just two people in a sticky situation  
Whatever I say bounces off and sticks to you

I wasn't so quick to break your fall  
And so you launched your arsenal  
I send my requiem in the mail  
It's so impossible to tell  
If you would break, if you could ever give in to me

I am rubber, you are glue  
We're just two people in a sticky situation  
Whatever I say bounces off and sticks to you  
It's so impossible to tell  
If you could break, if you would ever give in to me  
It's inconceivable to try  
to believe there's a sane one between us yet

We're just two people in a sticky situation  
Whatever I say bounces off  
I am rubber, you are glue

We're just two people in a sticky situation  
Whatever I say bounces off and sticks to you
