

## Self "Summersound"

Visit "[Summersound](#)" on MotoLyrics.com

Maybe we should take a long vacation  
Only to a place you've seen in your imagination  
A place where time stands as still as the Earth  
Racing beneath the stars

Hello sunshine, we're waking up  
People gather 'round for the summersound  
Farewell moonlight, we've had enough  
Watch your sorrows drown in the summersound

Now you've got a mind aliens could hang with  
You can always talk to me in any language  
Utter a sound, and  
I'll be around  
Above and beyond this life

Hello sunshine, we're waking up  
People gather 'round for the summersound  
Farewell moonlight, we've had enough  
Watch your sorrows drown in the summersound  
You've been a bird, and I've been a plane  
You've been real cool, and I've been insane  
But somehow it makes sense when I'm with you

Hello sunshine, we're waking up  
People gather 'round for the summersound  
Farewell moonlight, we've had enough  
Watch your sorrows drown in the summersound

In the summersound  
In the summersound  
In the summersound  
In the summersound
