"Together"

Visit "[Together](#)" on MotoLyrics.com

Well, you should see me walkin' with my girlfriend
Oh you would swear we both were one and it's
somethin' else, too
Walk so close, can't tell where one ends, the other
begins
So much love, just ain't no way to tell

You could see we make it together
You could see the love look in our eyes
You could see we make it together, forever

You should love someone the way that I do
Don't you know that your whole life's a stage?
Tryin' to find somebody, gonna love you
Love you like mine, if only for your own sake

You could see we make it together
You could see the love look in our eyes
You could see we make it together, forever

You could see a long-time love in action
We're livin' and we're lovin' our lives away, yeah

Oh you could see we make it together
You could see the love look in our eyes
You could see we make it together, forever
