Paul Gilbert)

["This tune features the debut of Paul's guitar synthesizer. He can now

make his guitar sound like violins, pianos, organs and more. Those are

REAL violins at the beginning."]

Guess what baby, the things we said

Came true today 'cause we listened to our hearts

No one but you will ever do

Our search is through, but our journey's just beginning

Chorus:

Nothing but love can last forever, nothing but love will start

To numb the place inside your heart that needed healing

Nothing but love can last forever, nothing but love will start

To make your head spin round and round, you know you're feeling

Love, nothing but love, nothing but love

Can't read your mind, Lord knows I've tried

But in your eyes I see everything I need to know

Nothing to do but follow you, my aim is true, I could never ask for any more

And if you walk away, you know that I will follow

To steal back your broken heart, at least until tomorrow

Because forever comes in days, beside you I can't
have it, you're the one

(Solo)

(chorus)

Nothing but love could hold our world together, nothing
but love can start

To let us hear the sounds above that I've been
screaming

Love, nothing but love, nothing but love

Love, nothing but love, nothing but love
