[Intro:]

I'd like to welcome you  
To a place we all know  
To a place we all been  
You either love it or you hate it

[Verse 1:]

I'd like to welcome y'all, to the heart of the city  
Where the people cold and they show no pity  
Better have a team or get stuck by committee  
Yeh I got a job but the pay is real shitty  
Beggars holdin' signs walk the street so silly  
We all got scams for real some hold millis  
Dollars to they name, some gettin' none some sons  
Niggas knock just to have little fun  
Some daughters bed hop just to have a little funds  
We all eat good if the child support comes  
First of the month cheques hit we like kings  
Servin' up fiends summertime ice cream  
Trucks bring joy back, to the lives of the kids mamma  
on crack  
Daddy's gone and I doubt he'll be comin' back  
Hit the lotto get money don't know how to act  
And it goes on

[HOOK:]

Time keep slippin' and time keep passin'  
And the cops keep harassin' and the streets still  
laughin'  
No place to turn when you livin' on the ave and  
Welcome to the heart of the city  
Where the chief pull choke, cats go for broke  
We all got secrets and the land use dope  
They shut down the block for the likes of the po'  
Welcome to the heart of the city

[Verse 2:]

Ain't nuthin' like the night life, all the clubs pack  
they lines tight  
and charge twenty at the door, 'bout twelve a.m. about  
ten dollars more

It's all worth the while once you hit the dancefloor  
[?] while you lookin' at the whores  
Damn she's so fine passin' by heaven's doors  
Gettin' out the cars these days they roll coors  
Where else traffic stop green lights just because  
Speakin' wid familiar faces, drinkin' Henny straight  
no chasers  
Alcohol lost its flavor, down Corona like it's tap  
water  
Goin' home no light city school teachers never had  
order  
Appreciate what the block taught ya  
Everyday the same niggas holdin' down the same  
street  
corners  
And they swear she lookin' good on her  
If you ain't fam, then you labled as another  
foreigner
