English Translation:

I can't see a path that can lead me forward
Stuck in a blinding darkness, stuck in an emotional

state
There's no light shining from the sky
Looking around, the heart's suddenly afraid

Why doesn't this long night pass on?
Will there be any path from here?

No matter what, I know the sun will shine tomorrow
But how long will the wait be or will the heart stay
forever in this eternal light?

Why doesn't this long night pass on?
Will there be any path from here?

No matter what, I know the sun will shine tomorrow
When the new morning arrives, the heart hopes to find
a path

When the sorrows of yesterday come crashing against
this weak heart
The reason the heart loses is that we neglected the
needs of our heart
My suffering has turned into an endless night, but I
know that this will pass
As long as time goes by, so will my sorrow because
eternal night doesn't exist
Day and night will continue on, that is time's endlessly
