(music: Tenkula & Sentenced, Lyrics: Lopakka)

Take this love, my dear, and cherish it in your heart

You shall have no fear...

Nothing could tear us apart

Accept this love sincere, from the bottom of my heart

for now our time is here...

and love shall heal the scars

Now twilight hides the clear, and haunts the day away

We cross the last frontier,

and it sets our hearts ablaze

The Waves lie still and gleaming on Our Sea

..and we're drifting down the stream...

Let's drown ourselves in this love

my darling, my only one

Let's give our lives for this love we are in

..make it forever...

Let my dry your tears

and hold you in embrace

Until we disappear in the grimson haze

The Flames rise, still so freezing on Our Sea

..and we're drifting down the stream...

Let's drown ourselves in this love

my darling, my only one

Let's give our lives for this love we are in

(we'll) do it together...

"...and we take our dive into the waters of eternity...

..here all pain has died and the only ones are you and

me..."

The haze lies still and bleeding on Our Sea

..and we're drifting down the stream...

(...to eternity!)

Let's drown ourselves in this love

my darling, my only one

(Let's) set sacrifices for this love we are in

..make it forever...

Let's drown ourselves in this love

Let's give our lives for this love we are in

(we'll) do it together...
