I know your thinking of those starlit summer nights  
When things were complicated  
But you had someone right by your side  
Ad you could lose yourself in  
Conversations meant for two of secure words  
Ad futures, and I love yous

Missing the one who you loved

And then she said I'm leaving this tonight  
Its things you've said to open up my eyes  
Believe me now I'm following what's right  
Its things you've said to open up my eyes

Missing the one who you loved

And then she said I'm leaving this tonight  
Its things you've said to open up my eyes  
Believe me now I'm following what's right  
Its things you've said to open up my eyes  
You opened up my eyes, tonight

I know that your missing the things you had  
Bt things will get better in time  
You know in your heart that this way is right  
But still there's emptiness  
You've got to find out what you've missed  
I pray this time you'll be alright  
Alright, alright, alright

And then she said I'm leaving this tonight  
Its things you've said to open up my eyes  
Believe me now I'm following what's right  
Its things you've said to open up my eyes  
You opened up my eyes, tonight
