Baby, up 'til now
My world has been an empty place
I never thought I'd feel the way I do
But then I saw your face, ohh-ohh, baby

You bring out the woman in me,
I just have to see you smile to feel brand new
And that isn't all that you do,
You bring out the warmth and the tenderness, too

You bring out the lovin' in me
By making me feel the way you depend upon
And nothing I do can go wrong
'Cause you bring out the best of the woman in me

To wake up everyday

And feel your body close to mine
A little love to start the day off right,
We'll make it all the time, ohh-ohh, baby

You bring out the woman in me,
I just have to see you smile to feel brand new
And that isn't all that you do
'Cause you bring out the warmth and the tenderness,
too

You bring out the lovin' in me
By making me feel the way you depend upon
And nothing I do can go wrong, baby
You bring out the best of the woman in me
