Oh,oh
Oh, oh

She never loved you
She was only passing time
She never knew you
You were just the run around
This is how it goes
You end up on the ground
But you can slow down
But you can slow down
But you can slow down

I'll be waiting
When there's nothing left to say
And you begging to fade away
You've got September all over again
I'll be waiting
When there's nothing left to say
And you begging to fade away
You've got September all over again
September all over again

It better rain today
Your river's running dry
You need a sun
To fill the black hole in the sky
You never win
No matter how you try
But you can slow down
But you can slow down
But you can slow down

I'll be waiting
When there's nothing left to say
And you begging to fade away
You've got September all over again
I'll be waiting
When there's nothing left to say
And you begging to fade away
You've got September all over again

September all over again
September all over again

She never loved you
She was passing time
She never knew you
You were just around

I'll be waiting
When there's nothing to say
And you begging to fade away
You've got September all over again
I'll be waiting
When there's nothing left to say
And you begging to fade away
You've got September all over again
September all over again
September all over again
