CHORUS [D-Shade & Revolution]

Watch how you climb 'cause life's angles are steep  
The body's on the surface, and the mind is in the deep  
Watch how you climb 'cause life's angles are steep  
The body's on the surface, and the mind is in the deep

[D-Shade]

The last time I examined heads and necks were having  
spasms

They were reacting to the actions and the fathoms  
That the, crews that deliver the new to your doormat  
The D and the Revolu don't try to give(?) like John  
Cusack

Open your mental vehicles, you're getting boarded  
We punch in the co-ordinates, and now we're ready to  
orbit

3-60 degrees around the planet

Making circles of MCs start to scream like Mike and  
Janet (heeeeeeeee)

Not only I, but crews be creeping in the deep  
That's why when they around I'm always hesitant to  
speak to

See I, do what I gotta to get sunlight down under  
Ground shaking down all them clowns that try to clutter  
(clutter)

Your mind with weak rhymes, got nerves to talk about  
mine

The creeps will know the diff between the good and  
wack rhymes

MCs with the skills be keeping it real in Mont Real  
And critics keep it tight lip, that's all part of the deal

CHORUS

[Revolution]

Deep penetration, wack crew in-filtration  
Putting them in traction for their biting infractions  
I crush, skulls manipulate and reform  
I take you late and inform, MCs how not to dis me  
Deep, thrust to trust me in a whole kid  
Coming from the land of Tut, you're in a bad rut

Depths unknown to man I'm under hell  
You can't understand without the use of a Vulcan mind  
melt  
I've lost my marbles on the verge of psychosis  
I'm leaving en-tire crews with broken noses  
The flow is like Crimson Tide when it hits your T-shirt  
So deep I'm like a submarine, soon you'll need an  
expert  
The setting, you're jetting (jetting) and you don't know  
where you're  
heading  
Well I'm betting you're bed wetting, and face is start  
reddening  
Don't be embarassed because you're careless  
Peep this we're fearless, to raise levels of awareness  
  
"I get deeper and deeper"
