I try To tell you But I  
What I mean is that I  
Everytime I see You I'm tongue-tied  
I try To tell you But I  
What I mean is that I  
When I see You  
You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here  
You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here

Hey I...I wanna walk up and say  
You know I've been thinking of You  
But afraid that You'd run away  
You know I've been keeping my distance from You  
Oh I know there must be a way  
To talk about it to your face  
But what'll I do if You walk away  
And what'll I do if You laugh on my face

You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here  
You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here

Hey I...I thought of calling You up  
'Cause You know I've been lying awake  
But I thought about it so long  
You know there's no way You'd still be awake  
So I lie back and face the fact  
And think about how to adapt  
'Cause if I can't find the words to say  
I'm gonna get to You a different way

You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here  
You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here

Hey I...I spend a good part of my day  
With my dictionary

Looking up words to say  
Words that will tell You about it  
And make it all so plain

Hey I...I'm not gonna worry about it  
I'll take my time and decide what to say  
But who knew that You were so near  
And now I'm looking at your smiling face  
Ooh I smile back...Oh I try anyway  
But You don't have a thing to say  
This is a different kind of game that We're playing  
There is nothing that your smile doesn't say

You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here  
You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here

You've got me tongue-tied when You're near  
I get so tongue-tied whenever You are here
