"Bull fiddle boogie"

There's a guy in our cowboy band
He plays the best bass in the land
He plays it on and off the beat
He plays it hot and he plays it sweet
He plays the bull fiddle boogie, he goes to town
With the solid beat that's so real low down

They come from near and they come from far
Just to hear him play that fourth of a bar
He gives it a slap and he gives it a spin
While he even puts the doghouse right up under his
chin
He plays the bull fiddle boogie, he goes to town
With the solid beat that's so real low down

He makes those notes walk up and down
You can feel that deep right through the ground
He makes that doghouse really ride
You can feel his rhythm deep inside
He plays the bull fiddle boogie, he goes to town
With the solid beat that's so real low down
