Shake it over, shake it over, mister, for me
I wanna know the truth behind my misery
Too many things are rolling behind my eyes
Oh God I think it's the age of technology
Too many things are buzzing on the net
So many faces I could forget
Give me a place where nothing's gonna shatter my
mind
Too many times I've been defeated
Too many times I fell down and bleeding
Oh God I think it's the age of technology
Good days are over I feel it
We're all numbers and no one's gonna heal it
Oh God I think it's the age of technology

No solutions, no solutions in the air
They could be here, here there and everywhere
There are so many signs ahead of me
There are too many things I could be
I guess I've reached the point I won't take anymore

So many times I've been defeated
So many times I fell down and bleeding
Oh God I think it's the age of technology
Good days are over I feel it
We're all numbers and no one's gonna heal it
Oh God I think it's the age of technology

You know I think it's the age of technology
Oh God I think it's the age of technology
You know I think it's the age of technology

Too many times I've been defeated
Too many times I fell down and bleeding
Oh God I think it's the age of technology
Good days are over I feel it
We're all numbers and no one's gonna heal it
Oh God I think it's the age of technology.
