We're the teens of the 80s  
Into the groove now  
Let your spirit rise  
We're the teens of the 80s  
Kissed for the first time  
Left childhood behind

Remember when the time was right  
All the hope, your eyes were bright  
Waiting for millennium  
Wondering if your dreams were right

When Tainted Love made you happy  
What A Feeling, can't forget  
Let it keep pushing you  
Let it make you never regret

We're the teens of the 80s  
Into the groove now  
Let your spirit rise  
We're the teens of the 80s  
Kiss for the first time  
Left childhood behind

Midnight express to your heart's desire  
How you dressed, a view to kill  
Did you ever encounter  
All your sweet dreams gave you a thrill

It's not the time to doubt yourself  
It's not the time to be negative  
There are people just like you  
Who will succeed and make it through
