We've been on thin ice for a long time,
But your cracks have shown me how you feel.
And I'm melting always standing in your sunlight,
Can you feel the frostbite snapping at your heels?

And she's been losing me.
Does things that I can't mention
To try and get attention, tension.
I've been losing sleep
On wondering if she knows
I'm stepping on my tiptoes, tiptoes.

We need a cure to solve our problems,
Some kind of antidote to take.
Take every memory back cos I don't want 'em.
And I can't stop when my feet wont touch the brakes.

She's been losing me
Does things that I can't mention
To try and get attention attention, tension.
I've been losing sleep,
On wondering if she knows
I'm stepping on my tiptoes, tiptoes

Keep repeating your answers.
Like watching ice dancers,
Going round and around and around round round.

She's been losing me.
Does things that I can't mention,
To try and get attention, tension.
I've been losing sleep,
On wondering if she knows,
I'm stepping on my tiptoes, tiptoes.

On wondering if she knows
I'm stepping on my tiptoes, tiptoes.
