The furthest star in the sky  
Well that's the one that passed her by  
I tried to wish upon that star it didn't get me very far  
It fell on empty ears  
It fell on empty hearts  
And my dreams they fell apart  
I'm always wishing I was someone else  
I'm always hoping I can see myself  
But I'll be free for what I believe  
And I won't sell my soul just to achieve my goal  
And I've been holding back the tears dreaming all  
these years  
And I'll sing from the heart if you listen to me  
Everything I do is what I believe  
The lights went out across the world  
And your house of cards came tumbling down  
Cos nothing stays and nothing sticks  
When you're roaming with the lunatics  
But my star in the darkest sky  
Twinkles and watches while the other stars die  
Upon your empty ears and empty hearts  
I'm always wishing I was someone else  
But I've given up the ghost  
I will never sell myself  
But I'll be free for what I believe  
And I won't sell my soul just to achieve my goal  
And I've been holding back the tears dreaming all  
these years  
And I'll sing from the heart if you listen to me  
Everything I do is what I believe  
The furthest star in the sky  
Well that's the one that passed her by  
I tried to wish upon that star it didn't get me very far
