in the __ the police are after me
took a crap in a safe way lot
dirty face (?) means the kids wont talk to me
if i dont wanna feel it then i gotta take a stand
cut my ears they bleed

cant remember much at all what you said to me
when i lay awake at night they twitch
if i dont wanna feel it then i guess i got to fear it
and i got to fear it right

i demanded more
but they dont give no more
i demanded more
but they dont give no more no more

is it true people see bad places?
ive been looking for the ceiling on the roof
in the cupboard of a civilized reality
they dont have to worry bout the color of their toes
they dont check their rows

i demanded more
but they dont give no more
i demanded more
but they dont give no more no more no more no more
more
