Buffalo City's gonna take you there  
Seattle, 91, San Francisco air  
Is gonna take you out on a date.

You can play all day on your tambourine  
Hit your little drum, even if it's right off key -  
Sounds fine to me!

Take each town inside your hand  
And cast it off like it's all been said and done.  
I'm gonna with those stones outside your wall  
And hope I get there before one  
Before one... or before none

Take that jump if you think you can,  
Make halfway, reach with one of your left hands,  
And push me back.  
If you trip & you fall,  
Well I'll catch you and you won't look like a fool at all,  
But I still know...

That you take my heart inside your hand  
And cast it off like it's all been said and done.  
I'm gonna count down with those stones outside your  
wall  
And hope you leave before I come.  
Else I'm gone... before the sun.
