Caroline, I've seen the sun again
I've felt the summer wind
For the first time since your good-bye
And the thirst I've kept inside
Has swallowed me alive
You had to fall to take my hand
You had to leave to make me understand
Stay on for me my new star, keep on lightin' up,
Push me on, Caroline

Caroline, I heard your name again
Said by a distant friend
To my surprise she hadn't heard
When your love flies, you hit the dirt
You know it's time to rise now
She had to fall to take my hand
She had to leave to make me understand
Stay on for me my new star, keep on lightin' up,
Push me on Caroline

Ah dear light I know you're with us all
And you laugh when we fall
And when we cry, find you everywhere
Everything, I see reminds me , every care
You turn it all to air
She had to fall to take my hand
She had to leave to make me understand
Stay on for me my new star, keep on lightin' up,
Push me on Caroline
