If you wanna get back your lady
Oh, yeah
If you wanna get back your lady
Your lady needs to know, oh, yeah

If you wanna get back your lady
Your lady needs to know, oh, yeah
Ah, if you really love her
You know you got to tell her so, yes, you do

If you wanna get back your lady
Communicate for real, hey, baby
Ah, ain't no way your lady's gonna find out
How you really feel, ooh

I was a young shy girl
I thought I found my world in you the day we met
You were so cool and wise
One look into your eyes and my heart started gettin'
upset

Never had no trouble tellin' you I love you
But you never did the same
You kept it all inside as if you had to hide your love
And that's a cryin' shame

Now we're apart, what can I do
But get this message straight to you

If you wanna get back your lady
Your lady needs to know, oh, yeah
Ah, if you really love her
You know you got to tell her so, yes, you do

Hey, baby

Take some time and figure out
If I'm the one you really miss
It's gettin' 4:00 a.m. and I'm lyin' here again
And I can't take much more of this

Didn't mean to hurt you, walk out and desert you
But I didn't know what else to do
It's just the chance I'm takin', hopin' I can wake you up
To what I'm goin' through

If you could find a way to start
The door's still open to my heart

If you wanna get back your lady
Your lady needs to know, oh, yeah
Ah, if you really love her
You know you got to tell her so, yes, you do

If you wanna get back your lady
Communicate for real, hey, baby
Ah, ain't no way your lady's gonna find out
How you really feel, ooh

Get you lady back
Get you lady back
Get you lady back (Now hear what I say)
Get you lady back (Hey, baby)
Get you lady back (Gotta get this message straight to
you)
Get you lady back (Gonna keep on tryin' until I do)
Get you lady back (I'll be right there by your side)
Get you lady back (Oh, you can't run, you can't hide,
come on)
Get (Come on, come on, come on, come on)
Come on, baby [Yeah], come on, baby, [Yeah], come
on, baby [Ooh]
Come on and get me, yes, you can get me, oh, yeah
