Don't need you
Wish you well
And now, watch out
Screaming backward in my own
She said shoot, quarter turn
She can snore, wait and never close the door

Lonely need us, shame shame on you son
Lonely need I
No you cant bury us
Won't you go right now?
Stay you can't help me now, unless you go right now?

Hold mine [x4]
Hold merit

We never come home
To file this chipper thing
No, down, and this story learned led
Never written down
