"Skull X"

Visit "[Skull X](#)" on MotoLyrics.com

The sky's black with locusts
My eyes are burning stars
There's a mountain of gold teeth
In every bank vault in this world
Wanna try and steal my face, my body and my soul?
Ridden on a bed of nails
Walkin' into walls

Ooo baby, do it again
Ooo baby
C'mon baby, do it again
(repeat x2)

Do I drown in my streams
Do I kill you in my dreams
Do I draw a knife across your throat?
Is your mouth an open grave
Will I fall upon your blade
Are those needles in your eyes
The blood of Jesus?

Ooo baby, do it again
Ooo baby
C'mon baby, do it again
(repeat x2)

Another teenage suicide, slit your wrists and laugh
When boredom kills
Shot morphine pills
Be faithful unto death
In every home a rapist
Are killers family men
Why do children
Hate their parents
Keep a shotgun underneath your bed

Ooo baby, do it again
Ooo baby
C'mon baby, do it again
(repeat x2)

So fly the skull and crossbones
Burns the union jack
Hang on to your eyeballs
Paint the daytime black
Choose your best friends carefully
Don't betray your code
Live outside society
Stay inside you soul

Ooo baby, do it again
Ooo baby
C'mon baby, do it again
(repeat x2)

Don't you find hard to laugh
When your mouth is full of broken glass?
Thoughts mutate to locusts
Skull exploding
Don't you find hard to laugh
When your mouth is full of broken glass?
Thoughts mutate to locusts
Skull exploding

Ooo baby, do it again
Ooo baby
C'mon baby, do it again
(repeat x2)

Do it again
C'mon baby, do it again
Do it again,
C'mon baby, do it again
Do it again,
C'mon baby, do it again
Do it again
C'mon baby, do it again..
