### "Beat Down"

Visit "[Beat Down](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I see we can relate, same problems that we face  
Not even if it was even and all the demons stopped  
Screaming at me  
Not even then would all this shit be satisfactory  
See, I see we can relate by the same problems that we  
Both face  
Trying to keep a steady beat towards the final melody.

Not even if I was even and all the demons Stopped  
Deceiving me  
Not even then could I forget that I had been deceived  
See, I see we can relate by the same problems that we  
Both make  
Make your friends the enemy and who's help will you  
Receive?  
And all these troubles are bothersome  
And all these bothers are troublesome  
See, we be the disease I'm thinking about how this  
Planet feeds  
I'm thinking about how this planet bleeds  
It's malnutrition that is killing she

The way of all doubt leads To the way of half doubt  
Leads  
To the way of no doubt If you doubt then look  
Because learning closes nothing more than one big  
Book  
Learning closes nothing more than one big book  
Well if money is the devil and the devil meets me  
Then I'd rather fuck the devil before the devil fucks  
Me  
I'd rather use the devil before the devil uses me

At the end of the tunnel only light we see  
And all these troubles are bothersome  
And all these bothers are troublesome  
Not even if it was even and all the demons stopped  
Beaming at me  
Not even then could all this shit recede

See, I see we can relate By the same worries that we

Embrace  
Trying to keep a steady feat towards the final  
Harmony.  
Not even if I was even and all the demons stopped  
Dreaming of me  
Not even then could I forget that I had been the  
Dreamed  
See, I see we can relate By the same problems that we  
Both face  
Make your friends the family, who's help will you  
Receive?  
And all these troubles are bothersome  
And all these bothers are troublesome  
Unfathomable past True things come to pass  
As grains in a sand glass contained within a flask  
The ball rolls continuous on and on before our eyes  
Getting strong and stronger with time continuous  
If you cannot devise improvise then analyze  
For it is you that has been chosen to crystallize the  
Prophesized  
If you're confused just remind your confusion  
It is nothing but illusion passing through  
Nothing but confusion masking truth  
Beware of blaming he for if he don't feel what you  
Feel  
It's cause he don't share the same deal but you're both  
Just as real  
Actions and reactions unfathomable past  
And all these troubles are bothersome  
And all these bothers are troublesome
