Aye PPro, you know which one of these sayings I hate  
the most cuz?  
It's when they say if you're scared go to church  
I don't know what they talking 'bout, 'cause I ain't  
scared  
Let's go

Aye you could say what you say but we ain't leaving  
here today  
We never back down, never, never back down  
And you gon' have to bring them choppers  
You want it and hope they stop us  
We never back down, never, never back down

Aye listen here boy, I want you to hear me loud and  
clear  
You could kick up all the dust you want, but we walk  
with no fear  
Now when they merk us in Sudan, lock us up in Pakistan  
Still ten toes down (what that mean) stand so  
I never back down  
Put that on my Momma, no way you gon' stop us, you  
gon' have to pop us  
We stay unashamed even if you bring them choppers  
And send this note to Congress, tell them that they ain't  
gon' block us  
We in yo school, in yo hood, at yo job  
Boy we move where you move, for the cross we going  
hard  
See this gospel made us strong, we are nothing on our  
own  
Fuego in our bones, and a pyro when I'm on  
In the face of persecution, what's this that keep us  
moving  
The fact we're bought by Christ, ain't no way that He  
gon' lose us  
Stay rooted in this truth, ain't no way you moving me  
Till my heart get acapella (what you mean) no beat!

Aye you could say what you say but we ain't leaving  
here today

We never back down, never, never back down  
And you gon' have to bring them choppers  
You want it and hope they stop us  
We never back down, never, never back down  
Never, never back down, never, never back down  
Never, never back down, never, never back down  
Never, we never back down, never, never back down  
Never, never back down, never, never back down

Back down there for PRo,  
All with beautiful feet no room for retreat,  
But speak and let 'em know, the gospel seed, yeah let  
it grow  
The blood that leaks comes from the martyrs  
Now they rest with the master so,  
Gettin' deep once more, here's a start  
(?) of Christ instead of dough,  
Instead of coke, instead of these  
Things the world intentionally bring  
Grieve when some intentionally leave the scene  
For some (?) scheme; me? I'm just a mortal being  
Who's seen the Immortal King  
How does that sound, put a background  
Of a (?) but stand for my Lord it seems  
It may sound boastful, maybe hopeful  
But I know a few who are ready to die  
Now they live but they hope to  
If Jesus calls they're ready to ride  
And cling into His (?)  
But most of us are Americanized  
Preserve the self, like most do  
But Jesus taught the opposite side  
Those who follow Messiah truly desire  
To live a godly life in Christ  
Will go for the fire, persecution will be required  
But by His grace, we'll stand in firm up in His word  
Since we down, no backing down, that's all for now  
(?)

Aye you could say what you say but we ain't leaving  
here today  
We never back down, never, never back down  
And you gon' have to bring them choppers  
You want it and hope they stop us  
We never back down, never, never back down  
Never, never back down, never, never back down  
Never, never back down, never, never back down  
Never, we never back down, never, never back down  
Never, never back down, never, never back down

You see I never back down, I don't even know how

Because before I do that, I would rather pass out  
Take a beating from a hundred people 'till I black out  
For the sake of the gospel, homie what's your life 'bout  
See I never never never back down, no never  
You can bring them guns, bring them choppers, it's  
what-whatever  
I done been in a place, gun in my face  
Stood my ground, they ran like a race  
Did all the lead for the sake of the world  
What you think I do now standing in grace  
You ain't seen nothin' like this before  
You think I'm lying, dirty you can ask the homie PRo  
PRo know that it is a problem when we walk up to the  
door  
Reach came 40 Deep, well I brought a hundred more  
And none of 'em back down, we don't even know how  
You keep thinking this is music, it's about to go down  
You can bring them guns, bust 'em, things go pow  
You can say what you want, bring who you want,  
We don't back down!

Aye you could say what you say but we ain't leaving  
here today  
We never back down, never, never back down  
And you gon' have to bring them choppers  
You want it and hope they stop us  
We never back down, never, never back down  
Never, never back down, never, never back down  
Never, never back down, never, never back down  
Never, we never back down, never, never back down  
Never, never back down, never, never back down
