

Shades Apart "Stormclouds"

Visit "[Stormclouds](#)" on MotoLyrics.com

Faceless generation
Legacy of pain
Blistered hands and fingers
Dark skies ruled by flame
Take this generation
It doesn't have to be this way
It's not my generation
We are the ones the right and wrong

We are the ones we're right and wrong
We are the ones we rise and fall
We are the ones we're without name
We are the ones who face it

Face this generation
Learn from yesterday
Can you see your whole life pass
Without skies red with flame
Faceless generation
Know the truth that is your pain
We are the new beginning
Our hopes our dreams our real today

Face this generation
The truth that's here to stay
Hopes and aspirations
Time is up today
Take this generation
It doesn't have to be this way
It's not my generation
We are the ones we're right and wrong
