Leaving a body that will be devoured by vermins living
Inside the flame of mortuary candles
Wax tears for the endless pain of the immortal corpse
The life that the mistress hide for the ass gave birth to
Me
Candle flame iluminating all the hell
Burials that are an aberration of sex and prayers
Inside the heaven's morgue
Mortuary Candles
Blackening all the light with dark fire
Lurking beings
Stealing prayers that are for me

Mortuary Candles
Solemn carbonize
The awaited time with a cadaver's patience
I watch out from within a church of atheist priests
Bizarre danzing shadows
The rhythm of the flames of the mortuary candles
Await the burning of the spirits
That will dismember my soul
Chorus x4
Mortuary Candles of black wax keys that open doors to
Unknown dimentions to another world and will
iluminare my
Ways in the cold beyond
