"Bring You Back"

Visit "[Bring You Back](#)" on MotoLyrics.com

Man down I see your every move
Face down you never thought I'd see it through
No sound from what's inside of you
Peace now for me and none for you

We kid each other
But nothing will bring you back to me
I see your cover and you try to hide it away
We leave each other
To find something that makes us wanna be
I see no other way around it all

Unfound I wish you only knew
So bound inside your narrow view
Reach out the hand that took to few
Leave now for all that's left is the rest of you

We kid each other
But nothing will bring you back to me
I see your cover and you try to hide it away
We leave each other
To find something that makes us wanna be
I see no other way around it all
(Way around it all)

(Solo)

We kid each other
But nothing will bring you back to me
I see your cover and you try to hide it away
We leave each other
To find something that makes us wanna be
I see no other way around it all
