"Fill Your Sails"

Visit "[Fill Your Sails](#)" on MotoLyrics.com

All the fears from all our years
Have filtered us from new ideas
We see just what we always see
The world is flat - we're dry of tears

Enlighten your thought
Sail out of your island port
The world's not flat
You're whole and complete
A ship in creation's fleet
Do you feel like that?

Fill your sails
Learn to fill your sails
Make yourself whole
And widen your soul
And sail with a wider world in you

Creation was bored
Created a life-filled game
Divided itself
You're from the same ocean out there
Of people everywhere
Begin from your source
Set a true course
And swell with the same life force

Fill your sails
Learn to fill your sails
Make yourself whole
And widen your soul
And sail with a wider world in you

Life is to share
You're whole and complete my friend
Adventure out there
The planet is round no end
Create your world whole
Sail with a wider soul
