"For Kay"

Visit "[For Kay](#)" on MotoLyrics.com

this world's my place this world is not mine it's such
an awful place pass 1999 wish everything had crashed
crashing cut the lights come around the woman being
killed the woman being lost percentages say what's
true it's false don't you see what's going on the safest
place is underneath the earth under space and matter
i'm trying to go home take the aliens home how'd we
end up here anyway my only mother what would you
say
they're killing everything today they're killing souls
and safety they're killing sanity my only mother what
would you say they're killing everything today 2 years
up in a tree and it's hard to come down in the land
of the free in the land of the free Julia what did
they steal sickness in health hell on the earth earth
in all it's wonder wonder insolence to blame my only
other shoot another
