So I've been talking to myself  
And I've been walking around for days  
Trying to make the pieces fit  
When always something in the way

(regret) And the world remains the same  
(perfect) To a word a single name  
(downside) On a road that isn't gone  
(distance) And I waited here for so long

And now I'm searching for myself  
I'm trying to find the words to say  
I can never let you go  
And a part of me will stay

(with you) I'll never let you down  
(I swear) You will never hit the ground  
(inside) And the voices still remain  
(outside) If you're lost I'll never hide

Before you open your eyes  
I'll be coming around again  
Before you open your eyes  
I'll just pretend  
I am always by your side  
I am always by your side

So I've been thinking to myself  
And I'm hoping I'll be right  
When I make the pieces fit  
Will I bring you back tonight  
I'm trying to find a way  
Now I'm running out of time  
Might try keeping it all inside

(I swear) If you're lost I'll never hide

Before you open your eyes  
I'll be coming around again  
Before you open your eyes  
I'll just pretend

I am always by your side  
I am always by your side  
By your side

I'll be coming around again

Open your eyes (open your eyes)  
'Cause somebody loves you  
Open your eyes (open your eyes)  
'Cause somebody loves you  
Open your eyes up and see

If you're lost I'll never hide

Before you open your eyes  
I'll be coming around again  
Before you open your eyes  
I'll just pretend  
I am always by your side  
I am always by your side  
By your side  
By your side
