Hey, hey my black friend, white friend  
Take the dogs, cats and parrots  
Call somebody and  
Somebody else

Come with me to take around  
Together with pilot Yuri  
And his small ship  
Of two sits, painted by hand  
Go squeeze,

Press the belt  
Come in everybody,  
It's so calm, you can't believe  
It's enjoy flying across the space, forget the jobs  
Let's near stars, near rainbow and orbits  
This is flower year, smile, this is love year

From here  
It's all calm, so calm  
Water, light, street and small,  
Your garden, your simple garden  
Boyfriends and little girlfriends  
Dad and mother, brother and aunt  
Everybody is getting happy  
Because the earth is blue

I could not imagine it,  
It's all so beautiful  
Good-looking, fine looking, precious  
It's so lovely, loveful, my little one, I can sing  
The earth is blue, the earth is real blue.
