After reading your letter  
I think I'd be better  
If I let you go

Your words have no meaning  
No sense in competing  
My tears over flow

The text on this paper  
Proves your love was vapor  
And deepens my cut

Im tired of bleeding  
My heart keeps on screaming  
I'm tearing them up

So time will reverse  
I'll dig my hole  
To tender affection  
Trust-worthy connection  
No words of comfort  
Silence my soul  
The painful reflection  
Must stop this INFECTION

See no future in your eyes  
no future in my eyes  
No love left in my life  
No life left in my mind

See no future in your eyes  
no future in my eyes  
No time to say good-bye  
I cut too deep inside

After viewing our picture  
It makes me feel sicker  
To know I'm alone

Your smiling expression  
Holds all my depression

Our love over grown

Take one last glance at her  
Her eyes hold no future  
My eyes start to shut

I mutter confessions  
And feel slow destruction  
While burning it up

So time will reverse  
I'll dig my hole  
To tender affection  
Trust-worthy connection  
No words of comfort  
Silence my soul  
The painful reflection  
Must stop this INFECTION

See no future in your eyes  
no future in my eyes  
No love left in my life  
No life left in my mind  
See no future in your eyes  
no future in my eyes  
No time to say good-bye  
I cut too deep inside

See no future in your eyes  
no future in my eyes  
No love left in my life  
No life left in my mind  
See no future in your eyes  
no future in my eyes  
I wanna say good-bye  
I JUST WANNA SAY GOOD-BYE

See no future in your eyes  
no future in my eyes  
No love left in my life  
No life left in my mind  
See no future in your eyes  
no future in my eyes  
No time to say good-bye  
I cut too deep inside
