Here it comes again,  
It's going to happen to me  
Here it comes,  
I should have learned to duck  
She's going to say,  
She's going away  
And I will have to live without her and survive

Here it comes,  
It looks just like the last wave I drowned in  
Here it comes,  
And I'm so far from shore  
She's going to go,  
And take her trinkets  
And I will have to live without her and survive

Here it comes again,  
The night is going to fall  
Here it comes,  
She's going to say good-bye  
She's going to go,  
And leave only me  
And I will have to live without her and survive.
