Awaken by a beam of light  
That twists the sky like a razor blade  
The sword of Domokles - the danger inside  
What lead us to destroy our ground?  
Let us pray that the brain stays alive

The world's balance stays on the edge  
1983 - the year of decision  
Will we survive the nuclear insane  
1983 - the year of decision

A new solution - the pershing power  
The dawn shall be in crimson red  
The iron curtain cuts the world in the two parts  
But now they are both destroyed

As the bombs fell on the ground  
It's like a new sun shinning on me  
My molecule are running into emptiness  
I take part of Armageddon and I burn
