You want to have coffee, meet for a drink  
Tell me your story, see what I think  
How I make sense of Time versus truth  
I tell you we're all just hanging on by one loose end

Shed this skin, Crawl within  
Get to the core of something more  
Then where I've been  
I borrow stories 'cause I'm bored with my own

Life threw us some curve balls  
We took a few bruises then batted them home

[Chorus]  
So let's drink to our blessings  
That helped us prevail  
Let bygones be bygones  
And breakups remain love that tried but failed

[Chorus]
