

## Shamen "Space Time"

Visit "[Space Time](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Spacetime,  
A fusion between the concepts of space and time  
Brought forward into one four-dimensional continuum

Right now and forever  
There will always be a moment  
Spacetime, select the spacetime  
Right now and forever there'll continue to be  
Matter Motion Energy  
Spacetime, define spacetime

A tumbling through space and through time  
The concepts of space and time are combined  
Twirling and twisting through red, blue and green  
The stars, the planets, the Nebulae seen  
Infinite outward and infinite in,  
So where did Infinity all begin?  
In the very same place where Infinity ends  
In the conscious minds and dreams of Shamen

Spacetime, spacetime  
There will always be a place for you in my spacetime  
An empty place in my spacetime  
Hard living on since you been gone  
(Space, space, space)  
Hard living on since you been gone  
(Time, time, time)  
Right now and forever  
There will always be a moment  
Spacetime, select the spacetime  
Right now and forever there'll continue to be  
Matter motion energy  
Spacetime, define spacetime

C is the speed, the velocity of light  
Electrons are moving, change vision in sight  
To form a new object of energy mass  
But where in our time is the question to ask  
Relative movements around and around  
Open my eyes with my feet on the ground  
Just for one second in the back of my mind  
Something just told me that this is spacetime

Spacetime, spacetime  
There will always be a place for you in my spacetime  
An empty place in my spacetime  
Hard living on since you been gone  
(Space, space, space)  
Hard living on since you been gone  
(Time, time, time)

Spacetime  
The fusion between the concepts of space and time  
Brought forward into one four-dimensional continuum

Time, time, time

Spacetime, spacetime  
There will always be a place for you in my spacetime  
An empty place in my spacetime  
Hard living on since you been gone  
(Space, space, space)  
Hard living on since you been gone  
(Time, time, time)

Space, space, space, space, space, space
