Everyday you ask yourself: "What can I do?"
Everyday you want to break the chains
Everyday you realize that there's no one by your side
Everyday you want to start a war

But you are too weak and you are alone
You don't know what to tell the world...
You know that you are different and they don't accept
you
So what can you do to feel better?
Dreh' dich nicht um
Schau nicht zur?ck
Geh auch noch das letzte St?ck
Bis zum Horizont
Niemand h?lt dich jetzt mehr auf...

You are running through the streets
You are crying in the night
You know you have to do something for a change
You are looking for attention with a gun in your hand...
You put it against your head
So everybody can hear the shotgun blast
Now they are looking at you - That's what you wanted
For a few seconds in your life, they care about you
And you die with a smile on your face...
