I close my eyes  
Wish to sleep  
At night my dear, you look so sweet  
Ice Angel, why are you so cold?

Ice Angel, it doesn't matter what you said to me  
I feel the coldness of your  
I see the frozen light inside your face  
One day, my love, it breaks my heart  
And I will not return,  
Not return to you, my love  
Not return to all this pain,  
Not return to all your love  
And after all I know,  
Only my heart will live on

If someone cries for you,  
It doesn't matter what you do  
(It doesn't matter what I do)  
If someone cries for you,  
And every lie comes back to you  
(Every lie comes back to me)  
It's a parting with this moment,  
Kiss your eyes with crystal lips  
(Kiss my eyes with crystal lips)  
I see the darkness inside your heart,  
There's no place for me to be  
(There's no place for you to be)
