"Leave The World"

Visit "[Leave The World](#)" on MotoLyrics.com

you lay on your bed this night
your eyes stir on the wall
there's no one beside you anymore
and you feel so alone

//: the candle burns in your room
rain keeps falling on your past
no hope for a better life
and you feel paralyzed

the black tear falls from your eyes
you hold the razor blade in your hand
one cut to end it all
you want to die tonight ://

//: on bloody wings you can fly
no one can hold you back anymore
you're on your way to eternal silence
no one can hurt you there

you want to escape from this life
you want to hide yourself tonight
from the darkness of your dreams
you just want to leave the world ://
