"I Still Love You"

Visit "[I Still Love You](#)" on MotoLyrics.com

See everybody needs someone by their side
And I can't go on without you another night
And since companionship's been gone
My life has been so slow without you, you
See it don't take a rocket scientist to know I love you

And it don't take a rocket scientist to know I need you
See if you believe that you and me
Can change the world some day
Then you believe me when I say

[Chorus]
I still love you
I still love you
I decided I still love you
I still love you
I decided

So what do you think
Let's get back together, let's get back together
It's nothing it could hurt, it could only get better
Think of what it lacks feel like
You and I didn't turn out nice into forever
See, see it don't take a rocket scientist to know I love
you
And it don't take a rocket scientist to know I need you
See if you believe that you and me
Can change the world some day
Then you believe me when

[Chorus]
I still love you
I still love you
I decided I still love you
I still love you
I decided

Never to not be so happy and sure of myself
Baby life without you is so dull, so dull, so dull
Now I know it will never be me loving someone else
This precious love you much I need this star

I remember when we first fell in love
I was too young to know what it was
I couldn't address what made me melt
But quick to tell you how it felt
That love is so real and it still is

[Chorus]

I still love you
I still love you
I decided I still love you
I still love you
I decided

Just look at the things, look when you do me and you
Life changing the face of those and that we once knew
So when it's the sun the shine the oceans are blue
And that we can laugh and cry and that through.
