"Black & White"

Visit "[Black & White](#)" on MotoLyrics.com

See your friends fighting against their health
See mankind fighting against itself
See nations marching into wars
See children dying under a car
See the bloods fighting against the crips
See the whites fighting against the blacks
See religions fighting against the sin

But who realize, no-one wins

See the blacks
See the whites
See your friends
See them die

Believe your lie
Let the victim die
Support your lie
Like them you will die
