Sarah, sweet Sarah, hold me so close to you
Reach out, no reason needed
You're the one for me, Sarah
You're the one for me
Like a dream come true, so beautiful
I will be with you forever
And if the nights grow cold, I'll be there for you
Please don't make me wait
People surround me, offers of sympathy
I just want to be left alone
Sarah, sweet Sarah, hold me so close to you

Take in all I say, listen carefully
Words I want you to remember
And if the nights grow cold, I'll be there for you
Please don't make me wait
People don't make me wait
People surround me, offers of sympathy
I just want to be left alone
Sarah, I'll miss you
I don't regret all that we shared together
Everything I need, given to me
